File Rescue

In case of accidental data loss, SONY SD Card users can use File Rescue software FILE RESCUE to try to recover their data for free.

Scan Utility

Scan Utility is a free software provided to Sony SD Card users to monitor the Card's status and condition. You can easily see the status of your card at any time you need and be aware whether a change is needed to protect your data. File Rescue and Scan Utility are available on Sony website.

* Compared to SD association standards

TOUGH

TOUGH

World's TOUGHEST SD Card

Your contents safe as never before

"Sony cares about keeping professional photographers work safe and steps up the SD Card specification with the new SF-G TOUGH..."

Monolithic design

SF-G TOUGH innovatively transforms the way SD Cards are being built – thanks to the one molding production process which prevents water, dust and dirt from entering the card.

Materials

Sony engineers have used harder materials to make it 18x stronger than the SD association standard which makes it the toughest SD card in the world.

Removal of easy-to-break parts

New SF-G TOUGH has no protection lock and is also the world's first ribless card. This protects your card even further by eliminating parts that easily break.

Waterproof

72 hours in 5 meters depth

Model name	SF32TG	SF64G	SFG1G
Capacity	32GB	64GB	128GB
Ean Code	027242908314	027242908321	027242908338

Bend proof

The toughest card in the world can withstand up to 18kg of pressure.

World's FASTEST SD Card

Never miss another shot

The new Sony SF-G TOUGH is the world's fastest SD Card.

SF-G TOUGH is the premium choice to fully experience the speed of your camera. This card enables you to enjoy burst shooting at the maximum of your camera possibilities and it is the perfect partner in your 4K video recordings.

Read Speed: 300MB/s

Write Speed: 299MB/s

Dustproof

No sand, dust, mud or dirt can enter due to the card's monolithic structure
