

# Panel Antenna

for Pro-Series and BeamLink-Series

**Extends the working distance up to 2000m**

## Technical Details

|  |                   |
|--|-------------------|
| Working frequency                                    | 5.1 - 5.9GHz      |
| Gain   | 16 +/- 1dBi       |
| Horizontal lobe width                                | 45° +/- 8°        |
| Vertical lobe width                                  | 25° +/- 3°        |
| Resistance   | 50 Ohm            |
| Antenna ports  | N type female * 5 |
| Vertical rotation angle                              | -30° ~ +45°       |
| Vertical height angle                                | 1-1.8M            |
| Materials  | ABS               |
| Stand material                                       | Steel             |
| Battery mount  | V-Mount           |
| Weight   | < 6kg             |
| Working humidity                                     | <=95%             |
| Working temperature                                  | -40° ~ 60°        |
| Water proof grade                                    | IPX1              |
| Size   | 450 x 200 x 25mm  |
| Working distance with Pro-Series and Beamlink-Series | up to 2000m       |
