camRade AN ALPHATRON BRAND

Serving the AV professional, camRade offers the best protection against rain, sun, snow and dirt for your professional AV equipment. Just like Alphontron, camRade only sells the highest quality of products. We offer a wide variety of weather resistant carrying bags and covers for all kinds of professional AV equipment. Thanks to the clever designs and use of high quality yet durable materials, such as Cordura® 1000 and solid stitchery, every camRade solution gives your equipment maximum protection while travelling and when carrying.

All camRade products are specifically designed to cope with the circumstances of work in the field- and we all know what that can mean! That is why many professionals worldwide rely on camRade products every day.

VISION

Our vision is to provide products with optimum protection and carrying comfort in all conditions. camRade is continuously developing a high quality range of solutions especially designed to protect and safely transport equipment. This is done in close cooperation with equipment manufacturers, as well as camera and audio users. We are in constant contact with AV professionals. Your feedback is essential for helping us optimize the camRade products and adapt to the everchanging users' needs. If you have special requirements, practical experience or other input which will enable us to improve upon our products, please let us know!

GUARANTEED QUALITY

camRade bags and protection systems are made to the requirements of professionals all over the world. That has been our motto for over 15 years. camRade distinguishes itself by producing high-quality bags with first class materials for affordable prices. All our bags are handmade in France and all come with a 10 year warranty.

TAILORED FOR PROTECTION

PROTECTION SOLUTIONS

For optimum protection of our professional AV equipment, camRade offers a variety of products that safeguard your camera and accessories. All products are fully tested by professionals in the AV industry.

EASY ACCESS

How do you guarantee optimal protection from the elements and retain access to the controls and all the functions you need while shooting? camRade offers easy access compartments and protective interiors on our products. While travelling, camRade gives you the comfortable; light, compact yet sturdy bags that fit safely and easily into any airplane overhead bin, car trunk or even between your feet as you travel by train.

FOR EVERY CONDITION

From the scorching heat of the desert to the freezing Arctic to the monsoon seasons or anywhere in between, no matter where you are going or what your usage level is, for all your camera needs, there is a camRade solution. Our number one priority is to protect your camera and accessories from all the elements, you can rely on that.

POPULAR CAMERAS

We have expanded our variety of products with accessories for the Blackmagic Cinema Camera and Production Camera 4K. This little piece of magic deserves to be treated with care, therefore we have designed the Blackmagic wetsuit for protection against rain. In close contact with Blackmagic users we are developing more camRade products for the Blackmagic cameras.

CAMBAGS

The camRade camBags consist of high quality, well-padded camera bags made from water-resistant Cordura®. These bags are especially designed for quick-draw camera access. The PVC coated interior makes it an incredibly sturdy bag. It not only keeps your gear dry, it gives you premium equipment protection. The camBags are fitted with strong zippers, extra compartments and handy mesh pockets allowing you to easily grab what you need, when you need it.

We understand that when you travel, you need to carry other things with you besides just your camera equipment. That's why we have also included room for additional accessories and/or business equipment. Every bag in the camBag series is equipped with a comfortable suede shoulder strap, a suede handgrip with Velcro closure and a special compartment for your white balance card. The PVC insert makes the camRade bags firm and more resilient, yet still flexible. The inside base of each camRade bag is equipped with a protective armored plastic plate. And, to take it one step higher, the outside covering boasts a non-slip extra protective underside built to withstand any surface.

Resistant against:

CB Single I

KEY FEATURES

- Water-resistant 1000 Denier Cordura exterior

- Handmade in France, Europe

CAMBAGS

CAMBAG CINEMA

The newest addition to the camRade series, the camRade camBag Cinema is made for the ultimate ease of use. The camBag Cinema easily fits your complete camera gear including rod support, Alphasatron ProPull Follow Focus and the Alphasatron EVF while keeping your equipment safe. Just take out your camera and you are ready to start shooting! The camBag Cinema makes it possible and safe to take your camera from one scene to the other, without having to disassemble. The bag has velcro and zipper closures and several cushioned, protected compartments with adjustable dividers. Two external pockets enable you to take important documents or small devices with you. The camBag Cinema is compatible with cameras like Canon EOS C100/C300/C500 and Sony PMW F5/F55.

CAMBAGS

CAMBAG SINGLE SMALL

The CB Single Small can securely store a professional camcorder up to 42 cm / 16.5" and its accessories in the main inside compartment. This compact yet roomy camBag is also equipped with one external mesh pocket along one side and one external zippered pocket along the other side for holding, for example, your tickets, passport and travel maps.

CAMBAG SINGLE I

The CB Single I is made to safely hold professional camcorders up to 55 cm / 21.7". This bag is equipped with an outside zippered pocket on one side and an easy-to-reach outside mesh pocket on the other side. These extra pockets are perfect for holding your white balance card, tickets and/or travel maps.

CAMBAG COMBO

The CB Combo is a compact camBag that will securely hold cameras up to 5,75 cm/22.3". There is plenty of room for accessories which makes this bag the perfect match for the most demanding videographers and film makers.

CAMBAGS

CAMBAG 650

The CB 650 will easily and securely hold a professional camcorder up to 65 cm / 25.6" and its accessories. The CB 650 is equipped with two zippered pockets and two mesh pockets, ideal for holding your white balance card, travel maps, tickets and any other items you need to have within easy reach.

CAMBAG 750

The CB 750 is the largest bag in the camBag series. It comfortably and securely fits a professional camcorder up to 75 cm/29.5" and will still have room for your accessories. The CB 750 is also equipped with two zippered pockets and two mesh pockets that can hold your white balance card, travel maps, tickets and anything else you need to have within easy reach.

HEAVYDUTY BAGS

CAMBAG HD SMALL

The CB HD Small will fit a professional camcorder up to 50 cm / 19.7" and its accessories. This bag is equipped with an outside flat mesh pocket, for putting quick-reach items, and various adjustable inside pockets.

Introduced in 2009, the camRade Heavy-Duty (HD) Small and Large camera bags are designed to provide maximum protection and versatility for your equipment. These bags feature a fully adaptable internal storage compartment, allowing you to alter the inside to the personal set up of your camera and still leave enough space to store all the necessary accessories in the inside of the bag. Thanks to the square design and the Heavy-Duty protection you can easily stack these bags on top of each other without damaging your equipment. Furthermore, the non-slip base is equipped with an armored plate, which protects your camcorder and equipment even when you are working in muddy conditions or on rocky terrain.

CAMBAG HD LARGE

The CB HD Large is designed to fit a professional camcorder up to 75 cm / 29.5" and its accessories. This bag is equipped with an outside flat mesh pocket, three adjustable inside pockets and two mesh pockets inside the top closure. Plastic reinforced siding makes the HD Large bag resistant against even the most extreme conditions.

ACCESSORYBAGS

CABINBAG

Thanks to the light weight and slim-fit design of the cabinBag, and because it meets all of today's strict airline regulations, you can place it in the overhead compartment of any airplane and keep your camcorder with you at all times. The cabinBag provides enough room to store a (ENG) camera body, lens, batteries and more accessories.

Consists of high quality, well-padded accessory carrying bags made from water-resistant Cordura®. camRade accessory bags are light and compact yet quite sturdy and fit safely and easily into the airplane overhead bin, car trunk or even between your feet as you sit in the train.

” camRade makes beautiful high quality bags and raincovers for all kinds of cameras. They keep a close eye on the industry, that's why I keep a close eye on this company! ”

Joas Burggraaf, the Netherlands

LENSCASE

The camRade lensCase offers protective carrying comfort for up to two lenses and their accessories. It is made from 1000 denier Cordura® nylon with plastic reinforced sides and a padded interior. The lensCase can be easily carried by its adjustable padded shoulder strap. This bag goes on to feature two removable filter pouches on each side, adjustable interior dividers, a large removable front accessory pocket and a handy flat mesh pocket in the inside of the lid.

Resistant against:

TRAVELMATES

The camRade travelMates are a series of extremely practical backpacks designed for maximum ease of use. Made from rugged Cordura® 1000 material and with a 5 cm / 2.0" foam padded interior, these backpacks can carry camcorders up to 72 cm / 28.3" plus accessories in cushioned, protected compartments. travelMate backpacks are cleverly configured so that weight is evenly distributed across shoulders and hips, thereby achieving optimal comfort. travelMates are particularly suitable for motorcycle use or when you simply need to keep both hands free. As an added bonus, the TM Handy now also includes a notebook computer pocket.

All the backpacks in the TM series have a reinforced viewfinder section that protects your equipment from damage and an adjustable strap that holds the camcorder firmly in place. They are fitted with two exterior touch fastener pockets, three exterior zippered pockets and an interior touch fastener flat net-pocket. Carrying the travelMates is simple and comfortable due to the adjustable and padded backpack straps, and quick handling is made possible by carrying straps mounted on the top of the backpacks as well as on the side with an overlapping grip. An armor-plated underside protects your camcorder even when you are working in muddy conditions or on rocky terrain. A tough PVC insert makes the bag more rigid.

Resistant against:

travelMate 720

KEY FEATURES

- Water-resistant 1000 Denier Cordura®
- Optimal comfort
- Reinforced viewfinder section
- Tough PVC inlay for extra protection
- Handmade in France, Europe
- 10 years of warranty

„ I travel a lot, so protecting my EOS C300 is very important to me. CamRade has without a doubt the best and most compact solutions. „
Lennart Jenner, USA

TRAVELMATES

TRAVELMATE 640

The camRade TM 640 travelMate is a 1000 denier Cordura® backpack with a 2,0" foam padded interior. It is designed to carry a camcorder up to 64 cm/ 25,2" in a cushioned, protected area.

TRAVELMATE 720

The camRade TM 720 travelMate is a 1000 denier Cordura® backpack with a 2,0" foam padded interior. It is designed to carry a camcorder up to 71.9 cm/28,3" in a cushioned, protected area.

TRAVELMATE HANDY I

The popular TM Handy I is a beautifully designed backpack that has a modular divider system. It is designed to carry a camcorder up to 17,3". It is the hipster among backpacks and very much beloved because of its quick-draw possibilities and laptop compartment. The Handy I is made of water-resistant, 1000 denier Cordura® fabric.

TRAVELMATE OUTBAG

The travelMate outBag, made of water-resistant 1000 denier Cordura® fabric, is the ideal bag to take 2-3 DSLR bodies and up to 6 lenses with you and gives you the comfort of a compact backpack. The lightweight outBag has room for a laptop up to 17", can hold 2 tripods, and can also perfectly be used for smaller camcorders.

LIGHTBAGS

The camRade lightbag series are especially designed to carry and protect lighting equipment. The lightweight designs reduce overweight expenses while the 1000 denier Cordura® nylon shell gives the equipment optimum protection. The padded interior has reinforced plastic sides and the bags are finished with blue nylon lining.

LIGHTBAG /ROLL

Designed to carry 3 mono lights and 3 light stands, the lightBag has a 1000 denier Cordura® nylon shell, reinforced plastic sides, fully padded interior and a nylon lining. Furthermore, it comes with adjustable Velcro dividers and a large zippered mesh pocket in the lid. The entire bag can be transported by using the 2 strap handles or an adjustable shoulder strap with pad. The lightBag Roll has all the advantages the lightBag has, but as an extra comfort this bag has integrated wheels for easy transportation.

LIGHTBAGS

LEDPANELBAGS 16" and 24"

camRade designed two ledpanelBags especially for transportation of LED Panels. The ledpanelBag 16" is made to carry two 1x1 LED Panel lights. The interior of the bag has a special compartment for five liters. The ledpanelBag 24" is designed to carry two 1x2 LED panels and multiple five liters. Both bags are made from Cordura® nylon, have rigid plastic sides, interior foam padding and a blue nylon lining. The cases are carried by two straps. On the back of the bag are two comfortable straps situated to use this as a real backpack. They also have multiple pockets for accessories and provide room for storage up to two light stands.

LITEPANEL BACKPACK

This specially designed backpack enables the user to transport two 1 x 1" Litepanels safely. The interior is made of a blue, padded-nylon lining and has a plastic internal divider to protect your lights from scratching each other or breaking. The bag features an exterior flap to carry light stands.

LITEPANELBAG

The camRade litepanelBag is especially designed for the litepanel 1 x 1 LED. This bag has sturdy, rigid plastic sides and can safely carry two 1x1 litepanels. Inside the bag there is a special compartment for five liters. Two outside pockets can be used to store up to 4 batteries or accessories like chargers, cables, etc. An adjustable exterior flap can store 2 light stands and has both a clip and Velcro closure.

AUDIOBAGS

camRade offers a wide variety of sturdy audioBags to carry and protect audio equipment. Some bags are even specially tailored to fit specific equipment models. audioBags are all made from 1000 denier Cordura® with our special noise-reduction materials and handy features. In rocky terrain, stormy weather, desert heat or polar cold, our bags are always up for the task. Any audioBag can be easily carried by the removable, adjustable shoulder strap (audioStrap) or an optional audio harness.

For harness use, durable metal rings are located on the top and underside of the audioBags to clamp the harness-belt onto the bag. Clear vinyl covers on top of the bag, fastened with Velcro, protect your equipment, while still allowing full view of the controls. The bag's main compartment securely holds the audio mixer or recorder and even has perforated ports between the compartments for the cables. audioBags are well organized inside and out.

Resistant against:

KEY FEATURES

- Compatible with multiple mixers or recorders
- Padded straps for optimal wear comfort
- Ideal with the camRade audioStrap
- Easy click on/ click off construction of the straps
- 10 years of warranty
- Handmade in France, Europe

AUDIOBAGS

AUDIOMATE I

The camRade audioMate I enables the sound engineer to carry additional equipment along with an audio mixer. This bag also contains a divider system, allowing you to organize the inside any way you like. The bag's structure is made from a padded foam interior with reinforced plastic sides. For added convenience, the audioMate has a detachable front pocket and two fixed pockets for microphones, cables and batteries.

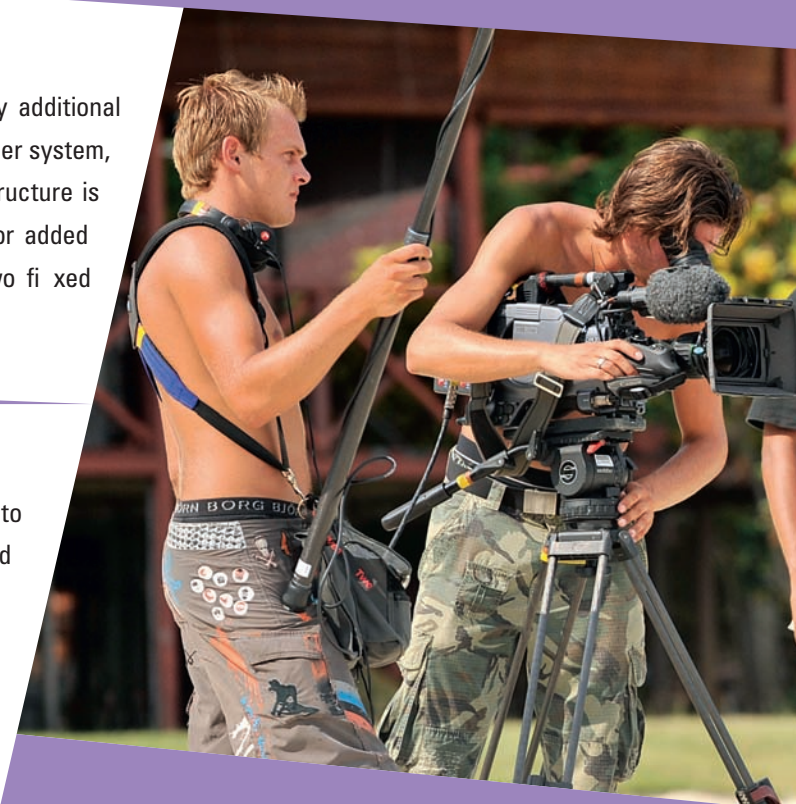

AUDIOMATE II

The camRade audioMate II is a 1000 denier Cordura® nylon bag designed to carry and protect many types of audio mixers or recorders. It has a padded foam interior with reinforced plastic sides. Each audioMate contains a large detachable outside pocket for headphones and cables. Each main compartment holds the audio mixer or recorder, where perforated ports allow cables to pass easily through to the recording equipment. Both audioMates are an ideal combination with the camRade audioStrap.

AUDIOMASTER

The camRade audioMaster is designed to carry and protect many different audio mixers or recorders. The audioMaster protects each specific mixer model in a specially tailored case. The clear vinyl window enables the user to easily read the meters. camRade's audioMaster has a padded foam interior with reinforced plastic sides. The bag has three pockets for various accessories. The main compartment holds the audio mixer or recorder. Perforated ports between the compartments allow cables to pass easily through.

AUDIOBAGS

SOUND  **DEVICES**

SOUND DEVICES 633

camRade offers a protective case especially designed for the Sound Devices 633 field mixer. The camRade SD 633 is a protective carrying bag that enables the audio professional to carry the devices without compromising recording or mixing capability. The bag is constructed from durable padded nylon, and has internal reinforcements for shock resistance, durability, and temperature insulation. An adjustable padded strap is included allowing the user to adjust load balance for ultimate comfort.

NAGRA VI BAG

The Nagra VI has cable outlets on both sides of the main compartment, as well as a clear vinyl cover which allows you to fully view the controls. This particular bag features a Velcro flap at the base, allowing you to change the battery without disconnecting. The outside pocket not only comes equipped with a divider, it is fully detachable as well. This section can easily store HF units, headphones, microphones and more.

AUDIOSTRAP

The camRade audiostrap makes carrying and working with an audioMaster or audioMate case comfortable. It is a waistbelt that is adjustable to your body, for optimal comfort. Audiostrap: is compatible with: audioMaster, audioMate I, audioMate II.

MONITORGUARDS

camRade has developed a monitorGuard which offers everyday protection for portable field monitors. All monitorGuards include a built-in sunhood. The smaller types can be used for portable director monitors and include a good quality strap.

TRIPODBAGS

TRIPODBAG I / ROLL

- Protects and transports a tripod up to 95 cm / 37.5" long
- The tripodBag I Roll has built-in wheels for easy transportation

The tripodBag is designed to carry your tripod in the most convenient way possible. Following the feedback we gathered from camRade users this bag has a rectangular design which, in addition to the providing maximum protection, reduces the risk of the bag rolling off trolleys or conveyor belts. Every tripodBag has a standard backpack option which is conveniently stored under a flap and fastened with a Velcro closure. As far as its construction goes, the tripodBag has reinforced plastic sides with a fully padded interior and a nylon lining. There is an interior full-length zippered pocket, and the bag can be easily transported by using its two carrying handles or comfortable, adjustable shoulder strap.

TRIPODBAG II / ROLL

- Protects and transports a tripod up to 105 cm / 41.5" long
- The tripodBag II Roll has built-in wheels for easy transportation

TRANSPORTER BAGS

The transPorter series are designed to carry all accessories a video professional might need for shooting, such as cables, batteries, chargers, microphones and personal belongings. The bags have removable interior dividers, allowing you to customize the interior to your personal needs. The case is made from 1000 denier Cordura® nylon with a foam padded interior and nylon lining and will keep your accessories safe and organized.

TRANSPORTER I

- Large front zippered pocket
- Two small side pockets with a touch fastener flap
- Flat zippered pocket
- Loops for carrying boom pole
- Removable, adjustable shoulder strap

TRANSPORTER II

- Large outside pocket
- Two small side pockets with touch fastener flap

SNOWCOATS

camRade's highly insulated, thermal snowCoat keeps your camera, batteries, lens and hands warm, even at extremely low temperatures. We even successfully tested the use of the snowCoat down to -56.2° Fahrenheit (-49° Celsius)! The snowCoat is made with a tough nylon shell and a supple velvet lining, and has full interior padding with insulation. We insulate the snowCoats with a compressed mineral wool sandwiched in aluminum layers. The LCD screen monitor has an integrated protector, and a cuff designed especially for operating the lens.

CAMSUITS

camRade camSuits are ingeniously designed form-fitting camera covers. These customized camera protection suits are made from 100% Cordura® and include extra foam padding on the inside. camSuits protect cameras from bumps and scratches. There is even a separate built-in rain cover that gives your camera additional 'foul-weather' protection when needed. The camRade camSuit allows you quick and easy access to all camera controls while giving your precious camera the ultimate out-door protection.

WETSUITS

WS PMW F5/F55

The camRade WS PMW F5/F55 is a soft flexible, waterproof PVC raincover that can be used around the Sony PMW F5/F55 aka 'TheNewF' camera with complete access to the controls, zoom and LCD monitor screen.

WS BLACKMAGIC

The camRade wetSuit Blackmagic is a soft flexible, waterproof PVC (polyvinyl chloride) rain cover that protects your camera against the elements. It can be used around the BMCC/ BMPC with complete access to the LCD screen, REC button, SSD slot and all camera in- & outputs. The WS Blackmagic raincover comes standard with extension for large lenses.

WS C300/C500

The camRade WS C300/C500 wetSuit's noiseless cotton interior fabric, unique to the camRade wetSuit, reduces unwanted sound effects caused by wind and rain. The cover has vinyl windows to view the controls. makes it the best choice to protect your Canon EOS C300/C500.

WS PMW 300

The camRade wetsuit Sony PMW 300 gives your camera optimal protection against the elements. This soft, flexible, waterproof PVC rain cover can be used around the Sony PMW 300 camera, protecting the camera's body, but also the viewfinder and microphone. The raincover has functional zipper closures on the underside, enabling you to put the camera on either your shoulder by taking out the camera's shoulder pad, or use the camera on a tripod or rig. For access to the camera's top handle, simply unfold the velcro closed opening on top of the raincover.

DESERTSUITS

The desertSuit is the latest feature in camRade camera covers. This suit protects your camera from harsh dust and water conditions found in dry, hot climates and is made with the same noiseless fabric technology as the wetSuit. Because the cover is manufactured in a sturdy white reflecting material, it minimizes and protects your equipment from the heating effect of the sun. Vinyl windows allow you to fully view the controls while your camera is kept safe from the elements.

MAINTENANCE

Some customers prefer their cases just the way they are; proudly wearing the dust and stains of long and faithful service. For those of you who do like a clean bag, read on. First, please do not dry-clean or machine-wash your Cordura® case. For removing built up dust and dirt, use a regular vacuum cleaner to clean the surface. For tough dried-on dirt, we also recommend using a brass bristle brush, the kind sold in super markets for scrubbing pots and pans. Cordura® is tough and a washing machine won't hurt the materials, but it will beat up the case as a whole and distort its shape.

REMOVING STAINS

CORDURA® Recommended Stain Removal Methods *	
STAIN	REMOVAL METHOD
Coffee, Fruit Juice, Milk, Soft Drinks, Tea, Tabasco Sauce, Wine, Urine,	Detergent ¹ / blot / water / blot
Ketchup, Chocolate, Blood	Detergent / blot / ammonia ² / blot / water / blot
Mustard	Detergent / blot / vinegar ³ / blot / water / blot
Spicy mustard (turmeric), Kool-Aid®	Solvent ⁴ / blot / detergent / blot / vinegar / blot / water / blot
Cooking oil, Crayon, Lipstick, Mayonnaise, Motor oil, Show polish	Solvent ⁴ / blot / detergent / blot / water / blot
Chewing gum	Freeze with ice cube / scrape / solvent / blot / detergent / blot / water / blot
Furniture polish, Ink (Permanent)	Paint remover ⁵ / blot / solvent / blot / detergent / blot / ammonia / blot / vinegar / blot / water / blot
Furniture polish, Shoe polish	Seek the help of a professional upholstery cleaner

Detergent:	One teaspoon neutral powder detergent (e.g. Tide or All) in 1 pint warm water.	⁴ Solvent:	Dry cleaning fluid - preferably 1.1.1 trichlorethane
Ammonia:	A 3% solution.	⁵ Paint remover:	Paint remover with no oil in it.
Vinegar:	White vinegar or a 10% acetic acid solution		

MAINTENANCE

Keep your camBag and camSuits in shape

Using a brass bristle brush won't damage the camBags or camSuits. For stubborn dirt build up, we recommend upholstery cleaner which can be bought at most auto supply stores. Make sure you follow the manufacturer's instructions. For those tricky stains that upholstery cleaner won't remove - like tar spots. - try using lacquer thinner. Dab the thinner onto an absorbent cloth or cotton ball and then simply wipe it off. Lacquer thinner will not harm the Cordura® nylon or the interior foam padding, but it should not be used on vinyl. Keep the thinner away from the clear vinyl windows and the white balance cards.

Well-conditioned equipment lasts longer

To keep vinyl windows and white balance cards clean, use a soft cloth together with either soap and warm water or the kind of smooth hand cleaner which you can buy at auto supply stores. Make sure the soap does not contain grit. A gritty cleaner will scratch vinyl. "Novus" Plastic Polish is great for cleaning plastics and clear vinyl, and it's easily available at most art supply stores. If you're looking for more of a "matte finish" for your removable white balance cards, you can use a bar of (gritty) Lava soap and warm water on a soft cloth.

Extra waterproofing

camRade cases are obviously not designed to be immersed in water, but they are designed to shed rain and splashes effectively without further treatment - even when dirty. But, for those of you who want extra waterproofing, we have some tips. Once your case is clean, you can spray on a water repellent product like "Scotchgard" (made by 3M and widely available). Because the real waterproofing is provided by the urethane coating on the inside of the Cordura®, any extra treatment you give your case will merely help it deflect dirt and moisture. If you are a stickler for waterproofing, treat the seams with "Seam Seal" (gooey substance that comes in a tube and can be bought at sporting equipment stores selling tents and rain gear).
