

### Zunow WCZ-280 4K Compact Wide Conversion Lens

**SKU:** ZUN-WCZ-280  
**EAN/UCC:** 8718591672286

The Zunow WCZ-280 wide converter is an x0.8 add-on conversion lens designed specifically for cameras and lenses with diameter filter threads of 77mm or 82mm.

This wide conversion lens has a full zoom-through and provides additional wide-angle capability. Whether you're shooting landscapes or working in tight areas, the WCZ-280 opens up the scene. This makes it the perfect lens for ENG-style shooting, when you need to get the best result in the shortest amount of time, under any kind of circumstances.

The WCZ-280 can be used in virtually any shooting environment while preserving the highest quality images with exceptional sharpness.

#### Compatibility

Thanks to the included adapter ring, this lens is appropriate for a number of professional 4K cameras from Canon, JVC, Panasonic and Sony. It also fits the LA16x8BRM lens Fujinon designed for the Blackmagic URSA Broadcast camera. View the attached compatibility chart for the corresponding cameras.

Attach the WCZ-280 to the 82mm or 77mm front thread on your lens and start shooting. You can even attach 95mm filters onto the front lens mount for added protection and image quality.

Zunow also offers the optional Zunow HU-105 rubber lens hood to prevent unwanted stray light from entering the lens.

#### Compact and lightweight design

Weighing only 0.97 lbs. (440g) this lens has been elegantly engineered in Japan and crafted without sacrifice in quality.
