

NANO SHIELD

Our lightest, smallest, fastest & most advanced
windshield kit yet

July 2021

NANO SHIELD

Microphone Windshield Kit

Our lightest, smallest and most advanced windshield kit

The **Nano** Shield has been designed to provide excellent wind protection and acoustic transparency for capturing clean audio.

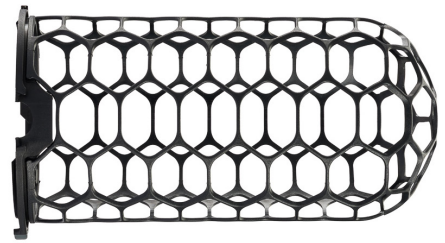

The entire kit incorporates several patented designs including advanced Lyre® shock mounts which are more compliant for lighter microphones and

a mounting bar with swivel arm that requires no tools to make adjustments or replace Lyre mounts.

The **Nano** Shield kits are also very versatile with interchangeable basket halves that allow you to change the size of the blimps by swapping out baskets without the need to buy an entire new kit.

Lightweight Hexagonal Design

- 30% lighter than standard kits
- Smaller overall footprint
- Improved acoustic transparency with less high frequency loss
- Oval shape w/ non-parallel sides offers better wind protection with less internal resonance
- Interchangeable basket halves to 'mix-n-match' for almost any sized microphone
- Removeable and interchangeable grey / black socks

'No Tools Needed' Mounting Bar, Swivel Arm & Lyre Mounts

- Patented mounting bar design with a 'turn-to-tighten' thumbwheel that locks the Lyre mic mounts to bar and locks the bar to the swivel arm
- Friction braking swivel arm allows adjustment by hand whilst keeping angle locked in place
- 360-degree movable XLR holder is also reversible to provide space for transmitters to point away from boom pole and direct cabling to point inward toward boom pole
- Kit includes both swivel arm adaptors for PCS connectors and 3/8" thread

Advanced Low Profile XLR Cable

- Low profile XLR connection allows longer mics to fit in smaller kits
- RF filter built-in
- Switchable 80Hz low cut included with kits
- Switchable 60Hz low cut and specialized stereo XLR connectors available (sold separately)

What's in The Box?

Each kit comes ready-to-use & included with:

- 2 magnet locking windshield basket halves
- Windjammer®
- 'No tools needed' mic mounting bar w/ cable clips
- Multiple pairs of advanced Lyre® mounts
- Friction brake swivel arm with PCS-tip
- Swivel arm 3/8" thread adaptor (for usage on booms or stands)
- PCS ergonomic handle
- Low-profile XLR cable with built-in RF filter and switchable 80Hz low-cut
- 360-adjustable and reversible XLR holder
- 2 pairs of wind socks (grey & black)
- Protective case (not shown)
