ART.NO 360-361

TANGO ROLLER

The Tango Roller is the latest product from Prosup. It performs with a self-developed high quality wheel and bearing combination for optimum shock-free and smooth movements.

The Tango Roller is maintenance friendly and can be operated in any environment.

The lightweight roller system is ideal for camera packages up to 15 kg and can be used in both over and underslung configurations.

The standard package (360) includes a 1.20m track length with a central tripodadapter and magic end stops. Also included is a universal button for any fluid head.

All track sleepers are equipped with 28mm pin location holes for use with light stands. The whole package weighs no more than 8 kg.

Optional: Depending on the type of Tripod we can also deliver 2 monopods for extra support at the ends of the system.

Track lengths available: 1m - 1.20m - 1.50m so the system can be endlessly extended with smooth transitions.

The entire set can be transported easily in a custom Pelicase (361) and offers space for standard accessories like tripod/stand adapters, light pins 28mm, protective tubes etc.
