LED

FreeStyle LED DMX

FreeStyle LED has three menu options, one white and two color menus. With white light Kelvin range is from 2700K to 6500K with **Dimming, Kelvin and Green/Magenta** control channels. In the color menu, Kelvin range is from 2500K to 9900K, with three additional channels, **Gel, Hue Angle and Saturation**. The Gel channel includes Kino Flo presets such as blue & green screen and over 100 well-known lighting gels. In addition, the Hue Angle and Saturation behave similar to a traditional color wheel, where you have white light in the center, and the Hue angle determines the color along a 360° range, and Saturation determines how much color is applied. The second color menu provides individual red, green, blue (**RGB**) control. For additional versatility, the FreeStyle LED panel can be easily removed from the housing and mounted onto a stand. The controller comes with standard DMX, wireless DMX (Lumen Radio®), universal voltage input 100-240VAC and 24VDC. It can be mounted to the fixture or run remotely with a 25ft extension cable.

Features include:

- Kelvin presets & custom settings, 2500K-9900K
- Dimming without color shift
- Green/Magenta control
- Dial in any color through Hue Angle and Saturation control
- Kino Flo presets and Gels
- Individual Red, Green, Blue (RGB) control
- Manual & DMX Dimming, DMX wireless (Lumen Radio)
- Removable fixture includes built-in Barndoors, Honeycomb Louver
- Twist-on, locking Center Mount and corner mount options
- KinoGrip Center Mount
