HyperDeck Studio HD Pro

The HyperDeck Studio HD Pro includes all the features of the Plus model but at a full rack width size, there's space for more features! The larger model has space for two SSD slots but still includes the two SD card slots of the smaller models. This means you can instantly move media cards between different models of HyperDeck Studio. You get the nice transport control buttons as well as a machined metal search dial with electronic clutch for limiting rotation when in shuttle mode. There are also dedicated buttons for jog, shuttle and scroll search dial modes. The rear panel has extra space so the timecode connections have been upgraded to XLR connectors.
