

CBKZ-UPG01

Upgrade software key to enable Live Logging with Planning Metadata

The CBKZ-UPG01 Upgrade key for XDCAM HD422 Camcorders such as the PDW-700, PDW-F800 and PMW 500* enables a powerful new set of capabilities that are an intrinsic part of the XMPilot Planning Metadata solution.

Live Logging functionality

Wireless LAN capability (requires the CBK-WA01 WiFi adaptor)

Visibility and editing of Planning Metadata in the XDCAM Browser

XMPilot extends the XDCAM metadata workflow to location producers, directors and camera operators, reducing the length of time it takes to get captured material on-air.

This will be supported on the PMW-500 in March 2011

Compatible Products

XDCAM

PDW-F800

XDCAM HD422 Camcorder

PDW-700

XDCAM HD422 Camcorder recording HD material at up to 50Mb/s onto Dual Layer Professional Disc

Option Boards, Modules and Plug-ins
